Unable to login to PINS for Internet Explorer

- If when you login to the Pins site it continually brings you back to the login page you’ll need to check if “Protected Mode” is enable
- In the web browser goto Tools --> Internet Options
- Once the window pops up click on the Security Tab
- Then click “Internet” (Green Circle)
- Look towards the bottom of the window for “Enable Protected Mode”
  - If the box is not check do so and then hit “Apply” then “Ok”
  - You should then be able to login the PINS site without being brought back to the login screen
- Click on “Local Intranet” (Red Circle)
  - Check to see if Protected mode is enable and if not click the box to check it then hit “Ok”
